WORK EXPERIENCE

2023
Cenfotec University · Developer

I developed the front-end and basic back-end functionalities for an e-commerce application focused on agricultural products. The application featured a purchase simulation, user profiles, and role management (admin, seller, customer). Additionally, I assisted my teammates in the development and progression of the project.

2024
Cenfotec University · Developer

I developed the front-end of a web application for gym management, featuring secure login, class and appointment reservations, and simulated payments with PayPal. I collaborated in the planning and the API for database connectivity, enabling CRUD operations and user and membership management.

EDUCATION

2017-2022
Tree of Life International School

Educational institution in Costa Rica that offers a comprehensive approach to education, combining a solid academic curriculum with programs in arts and sports, promoting values of respect and responsibility.

2023-2025
Bachillerato en Ingeniería de Software

Higher education institution in Costa Rica, focused on technological and computer science careers. It provides practical and innovative training, preparing students for the challenges of the digital world.
